

Automatically Updating Product Prices

WHMCS can automatically retrieve currency exchange rates and update product prices on a daily basis. This allows your prices to change alongside currency fluctuations.

Configure Automatic Price Updates

To configure WHMCS to automatically update your product prices:

- 1. Go to **Configuration > System Settings > Automation Settings**.
- 2. Scroll down to the *Currency Auto Update Settings* section.
- 3. Check **Exchange Rates**.
- 4. Check **Product Prices**.
