

# Creating Your First WP Squared Product

To sell something using WHMCS, you need to configure a product.

The steps below create a WP Squared product in WHMCS. In WHMCS 8.8 and later, you can easily offer WordPress hosting to your customers on a WP Squared server. WP Squared, a WebPro product, hosts and manages WordPress-specific accounts while offering a specially-tailored version of WHM that meets all of the needs of WordPress hosts.

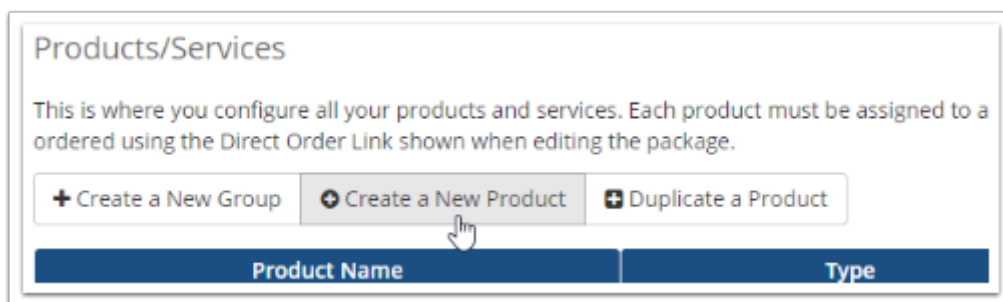

- ⚠ To configure a WP Squared product, you will first need [a WP Squared server](#). For more information about using WP Squared servers with WHMCS, see [WP Squared Account Provisioning](#).
- WHMCS offers several different ways to incorporate WordPress into your hosting product offerings. For more information, see [WP Toolkit](#) and [WordPress Hosting](#).

- i You will need to create a product group before creating your first product. For steps to do this, see [Setting Up Your First Product Group](#).

## Create a WP Squared Product

To create a WP Squared hosting product:

1. Go to **Configuration > System Settings > Products/Services**.
2. Click **Create a New Product**.

3. Choose **Shared Hosting** for **Product Type**.
4. Choose the desired product group.
5. Enter a name for the product.

**Create a New Product**

**Product Type**  
Defines how WHMCS manages the item. Don't see the type of product you're looking for? Choose *Other*

**Product Group**  
Click here to create a new product group

**Product Name**  
The default display name for your new product

**URL**  
A friendly URL to use to link to this product.

**Module**  
Choose a module for automation

**Create as Hidden**  
A hidden product is not visible to end users

**Continue**

6. For **Module**, select *WP Squared*.
7. Click **Continue**. A new page will appear.
8. In the **Details** tab, set the product's tagline and descriptions.

**Products/Services**

**Edit Product**

**Details** | Pricing | Module Settings | Custom Fields | Configurable Options | Upgrades | Free Domain | Cross-sells | Other | Links

**Product Type**: Shared Hosting

**Product Group**: Shared Hosting

**Product Name**: WP Squared Hosting

**Product Tagline**: Easy WordPress Website Hosting

**URL**: http://example.com/whmcs/index.php?rp=/store/shared-hosting/wp-squared-hosting

**Product Short Description**: Create and manage your website in WordPress.

**Product Description**: Disk Space:1GB, Bandwidth:3GB, WordPress Instances:5, Support:24/7

**Product Color**: [Color Picker]

**Welcome Email**: [Dropdown]

**Require Domain**: [Dropdown]

**Stock Control**: [Dropdown]

**Apply Tax**: [Dropdown]

**Featured**: [Dropdown]

**Hidden**: [Dropdown]

**Retired**: [Dropdown]

**Save Changes** | **Cancel Changes**

9. Check **Require Domain**. This is required for creating a hosting product.
10. Select a **Welcome Email** to send when provisioning the product.

WHMCS comes with several pre-made welcome email templates that you can customize at **Configuration > System Settings > Email Templates**.

11. In the **Pricing** tab, set the desired pricing options for the product.

To do this, select **Recurring** as the **Payment Type**, and then specify the desired monthly prices. You can also enter a **Setup Fee**.

For this example, the product will only be available on a monthly basis.

The screenshot shows the 'Pricing' tab of the 'Edit Product' form. The 'Payment Type' is set to 'Recurring'. The 'Currency' is 'USD'. The 'Setup Fee' is 5.00 and the 'Price' is 2.95. The 'Enable' checkbox is checked for 'One Time/Monthly'. The 'Allow Multiple Quantities' is set to 'No'. The 'Recurring Cycles Limit' is 0. The 'Auto Terminate/Fixed Term' is 0. The 'Termination Email' is 'None'. The 'Prorate Billing' checkbox is unchecked. The 'Prorate Date' is 0. The 'Charge Next Month' is 0. The 'Save Changes' button is highlighted.

Currency	One Time/Monthly	Quarterly	Semi-Annually	Annually	Biennially	Triennially
USD	Setup Fee: 5.00					
	Price: 2.95					
	Enable: <input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Allow Multiple Quantities: ☒ No  
☐ Yes - Multiple Services: Each unit represents its own individual service instance  
☐ Yes - Scaling Service: Each service instance allows a quantity to be defined

Recurring Cycles Limit: 0 To limit this product to only recur a fixed number of times, enter the total number of times to invoice (0 = Unlimited)

Auto Terminate/Fixed Term: 0 Enter the number of days after activation to automatically terminate (eg. free trials, time limited products, etc...)

Termination Email: None Choose the email template to send when the fixed term comes to an end

Prorate Billing: ☐ Check to enable

Prorate Date: 0 Enter the day of the month you want to charge on

Charge Next Month: 0 Enter the day of the month after which the following month will also be included on the first invoice

Save Changes Cancel Changes

You can set up as many pricing options as you wish during this step.

12. In the **Module Settings** tab, choose the **WP Squared** module and fill out the remaining product information.

The screenshot shows the 'Module Settings' tab of the 'Edit Product' form. The 'Module Name' is 'WP Squared' and the 'Server Group' is 'None'.

Module Name: WP Squared

Server Group: None

13. For WP Squared products, select a package from **WHM Package Name**.

The **WHM Package Name** menu populates after you select the module. The package list comes from WHM on your server, and WHMCS only reads them.

14. Select the automatic setup behavior at the bottom of the tab.

15. Click **Save Changes**.
