

Using Maintenance Mode to Prevent Customer Access

Sometimes, you may not want clients to access the order form or Client Area.

To prevent this:

Go to **Configuration > System Settings > General Settings** and choose the **General** tab.

Check **Maintenance Mode**.

Enter a **Maintenance Mode Message** to display to visitors while maintenance mode is enabled.

Alternatively, to redirect visitors, enter a URL in **Maintenance Mode Redirect URL**.

Maintenance Mode	<input type="checkbox"/> Tick to enable - prevents client area access when enabled
Maintenance Mode Message	<div>We are just performing some quick updates and will be back shortly.</div>
Maintenance Mode Redirect URL	<div></div> <div>If specified, redirects client area visitors to this URL when Maintenance Mode is enabled</div>

Click **Save Changes**.
