# Completing the Setup Wizard

The first time that you log in to the Admin Area, the **Getting Started Wizard** (or **Setup Wizard**) will appear before you reach the Admin Dashboard.

The steps in the **Setup Wizard** help you complete the basic settings for your company's information, accepting payments, registering domains, and selling hosting packages and other products.

> ⚠️ Before logging in for the first time, you **must** finish the installation process and configure the WHMCS cron job. After logging in, we recommend completing several tasks to configure your WHMCS installation.
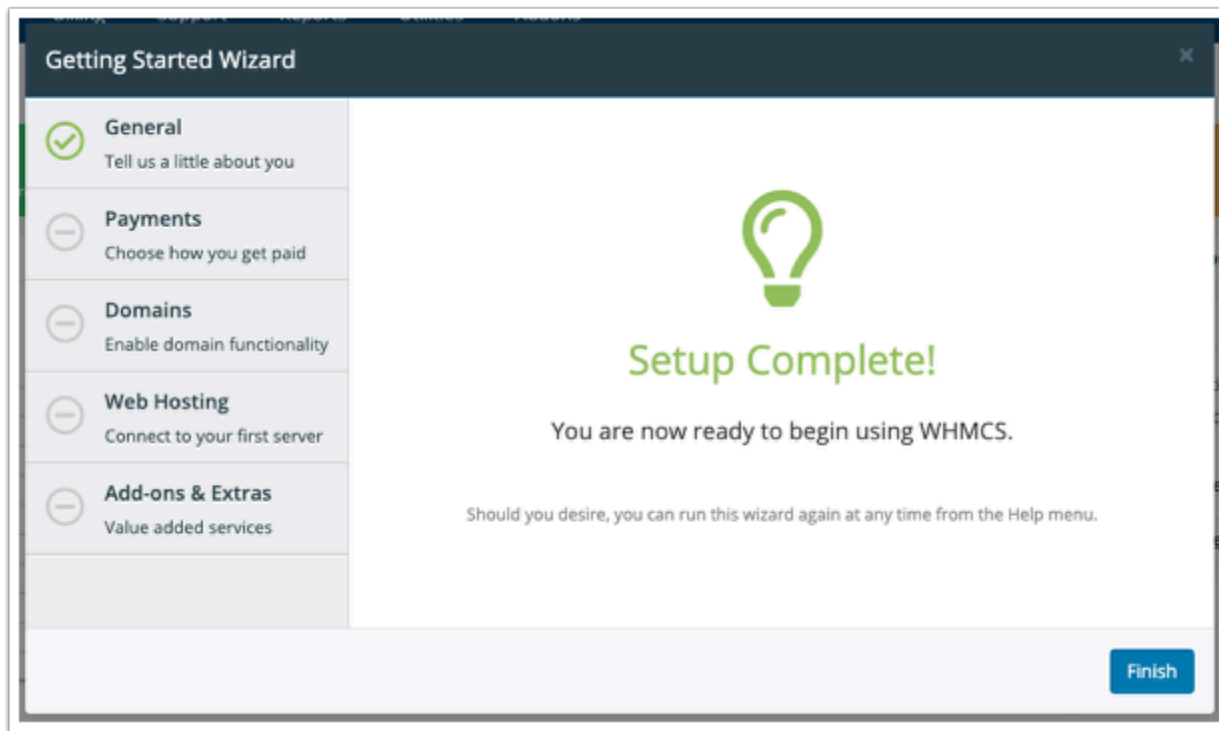

Setup Wizard

To complete the **Setup Wizard**, follow the displayed steps, clicking **Next** to move to each step.

After you complete the **Setup Wizard**, you will see the **Admin Dashboard**. It features a customizable layout with widgets for many parts of WHMCS.

> ℹ️ For more information on the **Admin Dashboard** and Admin Area, see Admin Dashboard and Admin Area.

💡   You can return to this interface at any time by going to **Configuration > Setup Wizard**.
