

Setting Up Your First Product Group

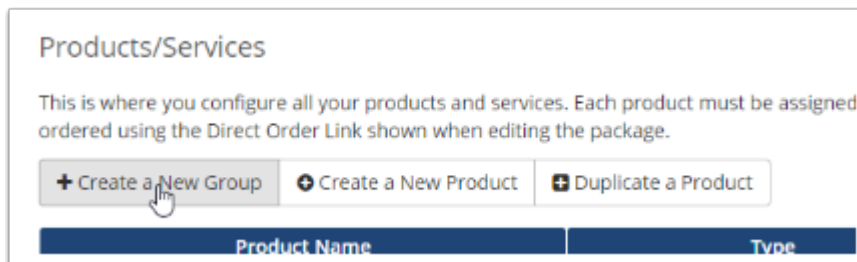

The first step to creating products is setting up a product group. **Product groups** are collections of related products or services that you sell.

i The steps below create a product group for shared cPanel hosting.

Creating a Product Group

To create a new product group:

1. Go to **Configuration > System Settings > Products/Services**.
2. Click **Create a New Group**.

3. Enter a **Product Group Name** (for example, `Shared cPanel Hosting`).
4. Specify a URL, headline, tagline, order form template, and the payment gateways that customers can use when they buy items from this group.

A screenshot of the 'Product Group' configuration form. The form has several sections: 'Product Group Name' with the value 'Shared cPanel Hosting'; 'URL' with the value 'http://whmcs-dev.test/whmcs/index.php?rp=/store/ shared-cpanel-hosting' and a green checkmark and 'OK' text; 'Product Group Headline' with the value 'We offer the BEST cPanel Hosting in the world!'; 'Product Group Tagline' with the value 'Amazingly fast speed and great customer service, too!'; 'Group Features' with a note 'You must save the product group for the first time before you can add features'; 'Order Form Template' with a grid of eight templates: 'Standard Cart (Default)' (selected), 'Premium Comparison', 'Pure Comparison', 'Supreme Comparison', 'Universal Slider', 'Cloud Slider', 'Legacy Boxes', and 'Legacy Modern'; 'Available Payment Gateways' with checkboxes for 'PayPal' and 'Credit Card' (both checked); and a 'Hidden' checkbox with the label 'Check this box if this is a hidden group'.

5. Click **Save Changes**.

After you create your product group, you can continue to create a product:

- [Creating Your First Shared Hosting Product](#)
- [Creating Your First Reseller Hosting Product](#)
- [Creating Your First VPS/Dedicated Server Product](#)
- [Creating Your First Non-Hosting Product](#)
