

Configuring Domain Extensions (TLDs)

If you want to sell domain registrations with WHMCS, you will need to configure the domain extensions (Top Level Domains or TLDs) that you want to offer.

 You can also learn about installing WHMCS by watching the video below.

Configuring Domain Extensions in WHMCS

To configure the extensions you will offer:

1. Go to **Configuration > System Settings > Domain Pricing**.
2. In the last row of the TLD list, enter the new extension you want to add. For example, the **.co** extension below:

TLD	Pricing	DNS Management	Email Forwarding	ID Protection	EPP Code	Auto Registration			
.com	Open Pricing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Reseller			
.net	Open Pricing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Reseller			
.org	Open Pricing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Reseller			
.co.uk	Open Pricing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Reseller			
.social	Open Pricing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Reseller			
.co		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Enom			

3. Choose your desired options (for example, **DNS Management**, **Email Forwarding**, or **ID Protection**).
4. If you need an **EPP Code** to transfer this TLD, check **EPP Code**.
5. For **Auto Registration**, select the registrar to use to automatically register the domain.

If you select *None* for **Auto Registration**, you must perform domain registrations manually by accepting the order and then manually selecting the registrar for that individual order.

6. Click **Save Changes**.

7. Click **Open Pricing** for the extension. A new window will appear.

8. Check **Enable** for all of the pricing intervals that you want to use. For example, one, two, and three-year terms:

Domain Pricing for .co

Check the Enable box to enable the pricing for that currency and term. Set Transfer/Renew pricing to -1 to disable transfers and renewals for that term.

Pricing Slab for: Default Base Slab

	Currency	Enable	Register	Transfer	Renewal
1 Years	USD	<input checked="" type="checkbox"/>	9.95	4.95	15.95
2 Years	USD	<input checked="" type="checkbox"/>	19.95	14.95	24.95
3 Years	USD	<input checked="" type="checkbox"/>	29.95	24.95	34.95
4 Years	USD	<input type="checkbox"/>			
5 Years	USD	<input type="checkbox"/>			
6 Years	USD	<input type="checkbox"/>			
7 Years	USD	<input type="checkbox"/>			
8 Years	USD	<input type="checkbox"/>			
9 Years	USD	<input type="checkbox"/>			
10 Years	USD	<input type="checkbox"/>			

Save Changes Close Window

9. Enter your desired pricing and click **Save Changes**.

 For more information on domain pricing, [see Domain Pricing](#).
