## **Configuring your First Payment Gateway**

Setting up a payment gateway is a crucial step in configuring your WHMCS installation. If you want to receive payments from your customers, you must activate at least one payment gateway.

The method for activating a gateway depends on your version of WHMCS.

## **Configure a Payment Gateway**

To configure a payment gateway:

- 1. Go to the appropriate interface in the WHMCS Admin Area.
- If you use WHMCS 8.6 or later, go to Configuration > <u>Apps & Integrations</u> and choose the Payments category.

- If you use WHMCS 8.0 to 8.5, go to Configuration > System Settings > Payment Gateways and choose All Payment Gateways.
- If you use WHMCS 7.10 or earlier, go to Setup > Payments > Payment Gateways and choose All Payment Gateways.

	Amazon Simple Pay (deprecated)	AsiaPay	Authorize net	Authorize.net CIM	
	Authorize net Echeck	Bank Transfer	BluePay	BluePay Exheck	
	BluePay Remote	Boleto	Carntech	CashU	
	CC/werue	ChronoPay	CyberBit	Direct Debit	
	EEECurrency	eMatters	e-onlinedata	e-Path	
	eProcessingNetwork	eWay Token Payments	Cobrança - F2b	FactHors	

WHMCS includes many <u>supported payment gateways</u> by default, and you can find more in the WHMCS Marketplace.

2. Find the desired payment gateway in the list (for example, <u>Stripe</u>) and click on it.

stripe	Stripe
A popular secure tokenised credit card merchant solution.	Category Payments Support
Stripe is one of the world's leading online payment service providers. Stripe makes it easy to accept credit card transactions, ACH payments, and alternative payment methods in over 135 different currencies and securely manage an online bushess.	Homepage Documentation Integration Developer WHMCS
Why use Stripe?	Activate
Accept all major debit and credit cards Benefit from Stripe Elements, which heips your users input their payment information quickly and correctly at checkout Better detect and prevent fraud with the help of Stripe Radar and optional 3D Secure Achieve PCI-DSS compliance with Stripe Elements hosted input fields Benefit from free updates and new innovative functionality as Stripe launches new features and products	

3. Click **Activate**. The system will redirect you to the configuration form for that payment gateway.

Each payment gateway requires its own set of credentials, which vary from gateway to gateway. For more information, see <u>the documentation for your payment gateway</u> <u>module</u>.

## 4. Click Save Changes.

5. Repeat these steps for each payment gateway you want to use.
