

Changing the Number of Records to Display Per Page

You can easily change the number of results that display in lists within the Admin Area.

Change the Number of Records to Display

To change this setting:

1. Go to the **General** tab at **Configuration > System Settings > General Settings**.
2. For **Records to Display per Page**, select the desired number of displayed records.

A screenshot of a web application's configuration interface. It shows several settings: 'Limit Activity Log' with a value of '10000', 'The Number of' (partially visible), 'Records to Display per Page' with a dropdown menu currently showing '50', and 'Maintenance Mode' with an unchecked checkbox and the text 'Tick to enable - prevent'. A red rectangular box highlights the 'Records to Display per Page' dropdown menu.

3. Click **Save Changes**.
