

Receiving a BCC Copy of All Emails that WHMCS Sends

You can easily configure WHMCS to send you a BCC copy of all of the email your WHMCS installation sends to clients.

Configuring BCC Copies

To set this up:

1. Go to the **Mail** tab at **Configuration > System Settings > General Settings**.
2. For **BCC Messages**, enter the email address to receive the BCC copies.

The screenshot shows a configuration box with a label 'BCC Messages' on the left. To its right is a text input field. Below the input field, there is a light blue tooltip or help text that reads: 'If you want copies of all emails sent by the system sent to an address of yours'.

3. Click **Save Changes**.
