

Troubleshooting an Undefined class constant 'Active' Oops Error Message upon ordering

Symptom

After applying the 7.9.0 update and placing an order, the following Oops error is displayed when the **Only Auto Provision for Existing** option is enabled.

```
exception 'Whoops\Exception\ErrorException' with message 'Undefined class constant 'Active'' in /home/v79whmcssupport/public_html/whmcs/includes/invoicefunctions.php:0
```

 Click to copy

Workaround

Disable the Setup > General Settings > Ordering tab > Only Auto Provision for Existing option

Solution

Please apply the 7.9.1 Maintenance Release via the **Utilities > Update WHMCS** page.

Hotfix

A hotfix has been created for 7.9.0 only which will resolve the cause of this error:
